

## L0PZ0101 Obelix ON/OFF Solenoid Module Ex ib Intrinsically Safe I/O Analog Inputs 12 Bit Type A

The Obelix Mining PLC I.S. I/O Module provides intrinsically safe (Group I Ex ib) input and output resources in a single, compact unit.

A unique fibre-optic communications interface means that the module and dedicated I.S power supply can be conveniently segregated into its isolated zone.

The fibre-optic link between the module and an Obelix processor module provides real-time control and monitoring of all I/O points.

This solution is ideal for mobile mining equipment where limited installation space must be managed.

Uniquely Keyed Type Connectors to prevent incorrect machine installation.

**The module is Dual Obelix Type which complies with AS/NZS 4240 standard.**

**As per standard, every output includes two switches A&B in series with monitoring feedbacks from both.**

**Extra safety is achieved by using two potted boards where each includes main and watchdog processors monitoring the correctness of executed main software code.**

**Module Primary board – A18\_B0L32**

**Module Secondary board - A22\_B0MZG**

Mounting options can vary depending on customer requirements.

### Display Diagnostics

The integral 4 character LED Matrix display provides the end user with some basic diagnostics as to the operation of the module. These messages are as follows:

### Message Explanation Result

#### ON

Omni Flashing Indicates nominal operation and signifies that CAN communications have been established with a host. Normal Operation Permitted

#### CAN

This indicates CAN Communication has not been established or has been lost. Outputs Disabled

#### FEBK

This indicates that internal is NOT congruent with requested outputs. This typically occurs when output has been requested but has failed to operate indicating a supply failure or wiring error. Outputs Disabled

#### SHRT

This indicates that a short-circuit condition has been detected as a requested output. This short-circuit could be external (most probable) or internal Outputs Disabled
